DEC 17 2007

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) An information handling system, comprising:

a graphical user interface in an operating environment, the graphical user interface configured to provide at least one display including information related to at least one channel wherein the display includes a control corresponding with at least one programming function related to the at least one channel;

wherein the display includes an on-screen display that combines a graphic element comprising the control with a broadcast streaming video from a second channel; and

wherein said control is one of a plurality of controls including a recording control for recording the at least one channel.

2. (Canceled)

3. (Previously Presented) The information handling system of claim 1 wherein the banner overlay includes a current banner and a browse banner.

Serial No. 10/764,678

Docket No. GTW-0138 (P1263US01)

4. (Previously Presented) The information handling system of claim 1, and further comprising a tuner operably coupled to the graphical user interface, wherein the tuner is tunable to a plurality of channels including the at least one channel and said second channel.

5. (Original) The information handling system of claim 4 wherein the plurality of channels includes at least one event.

6. (Original) The information handling system of claim 1, and further comprising a convergence system operably coupled thereto.

7. (Currently Amended) A medium having executable instructions stored thereon for execution on a suitably equipped electronic system, the instructions for causing the electronic system to perform a method, the method comprising the steps of:

generating a display, wherein the display includes a control related to programming at least one channel, the display further including broadcast streaming video from a second channel different than said at least one channel; and

accepting an input to the control to program a function related to the at least one channel;

wherein said control is one of a plurality of controls including a recording control for recording the at least one channel.

Serial No. 10/764,678

Docket No. GTW-0138 (P1263US01)

8. (Original) The medium of claim 7 wherein the suitably equipped electronic system includes a convergence system.
9. (Original) The medium of claim 7, wherein the step of generating a display includes the step of generating a banner overlay.
10. (Original) The medium of claim 9, wherein the step of generating a banner overlay includes the steps of generating a current event banner and generating a browse banner.
11. (Previously Presented) The medium of claim 7 wherein the electronic system receives a plurality of channels including said at least one channel and said second channel.
12. (Original) The medium of claim 11 wherein the plurality of channels includes an event.
13. (Currently Amended) A system, comprising:
- means for generating a display, the display including a control for programming at least one function related to at least one channel combined with broadcast streaming video from a second channel different than said at least one channel; and
- means for providing at least one prompt in the display, the prompt corresponding with said at least one function related to the at least one channel;

Serial No. 10/764,678

Docket No. GTW-0138 (P1263US01)

wherein said control is one of a plurality of controls including a recording control for recording the at least one channel.

14. (Original) The system of claim 13, and further comprising means for selecting the at least one channel from a plurality of available channels wherein the available channels include events.

15. (Previously Presented) The system of claim 13, and further comprising means for receiving inputs for the control related to the at least one channel.

16. (Original) The system of claim 13, and further comprising means for performing the function related to the at least one channel.

17. (Currently Amended) A method for use with an information handling system, the method comprising the steps of:

generating a display including information related to at least one channel wherein the display includes at least one prompt;

generating a video output;

selecting a browse mode wherein the video output does not correspond with the at least one channel; and

Serial No. 10/764,678

Docket No. GTW-0138 (P1263US01)

receiving a command in response to the prompt wherein the command corresponds with at least one function related to the at least one channel;

wherein said command is one of a plurality of commands including a recording command for recording the at least one channel.

18. (Canceled)

19. (Previously Presented) The method of claim 17 wherein the step of generating a display includes the step of generating an overlay having a current event banner and a browse banner.

20. (Previously Presented) The method of claim 17, and further comprising the step of receiving a plurality of channels, wherein the plurality of channels includes the at least one and a second channel.

21. (Previously Presented) The method of claim 17 wherein the command corresponds to the programming of said at least one function.

22. (New) The information handling system of claim 1, wherein the plurality of controls includes one or more controls selected from a group consisting of the recording control for making settings to record the at least one channel, a favorite channel control to add or delete

Serial No. 10/764,678

Docket No. GTW-0138 (P1263US01)

the at least one channel from a favorites list, and a rating control to set a rating of the at least one channel for limiting access by a viewer.

23. (New) The medium of claim 7, wherein the plurality of controls includes one or more controls selected from a group consisting of the recording control for making settings to record the at least one channel, a favorite channel control to add or delete the at least one channel from a favorites list, and a rating control to set a rating of the at least one channel for limiting access by a viewer.

24. (New) The system of claim 13, wherein the plurality of controls includes one or more controls selected from a group consisting of the recording control for making settings to record the at least one channel, a favorite channel control to add or delete the at least one channel from a favorites list, and a rating control to set a rating of the at least one channel for limiting access by a viewer.

25. (New) The method of claim 17, wherein the plurality of commands includes one or more commands selected from a group consisting of the recording command for making settings to record the at least one channel, a favorite channel command to add or delete the at least one channel from a favorites list, and a rating command to set a rating of the at least one channel for limiting access by a viewer.
